### **DETAILED ACTION**

After further review, it is deemed that a further restriction to claims 12-26 should have been made in previous USPTO Action on 10-05-05. Examiner apologizes for any inconvenience this may have caused. Applicant is invited to call Examiner to expedite election @ 571 272-4488.

#### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, drawn to a pad assembly, classified in class 204, subclass 212.
- II. Claims 12-16, drawn to a pad/subpad assembly, classified in class 204, subclass 229.4.
- III. Claims 17-25, drawn to a substrate processing apparatus, classified in class 204, subclass 224M.

The inventions are distinct, each from the other because of the following reasons:

Inventions I,II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
